TASTE

We have a taste for doing things well

We grew up in the Langhe region, working with the passion of those who know the land and its fruits intimately. A careful and competent search for the best raw materials, combined with care in the preparation of recipes, allows us to offer gourmet quality for everyone. Even today, when we are growing with an increasingly wide range of products, we remain faithful to uncompromising quality.

TRUST

**Everything made in "our home".
The secret of a Cascina without secrets.**

Do you know that we produce everything (really everything) in our Cascina? We work with pleasure and passion, all of us together, because each of us has in his DNA the life in the fields and the love for good food. Elio Rossetto grew up farming on his family's land, peasants for generations, the same type of vegetables and fruits that today are used in our preserves. You can believe in us because we are the first to believe in what we do! We will never try to offer you a speciality if we are not fully convinced. What we offer you is what goes on the table in our homes too.

LOVE

Passion and conscience to delight you every day.

We are a team that works with passion, a small family business that has always done this, where everyone is personally committed. We believe fully in what we do and in the goodness of our products. We only prepare products that we also love to eat. Every day we source the freshest vegetables, the healthiest and juiciest fruits, the tastiest meats, from the best breeders and farmers we have discovered. Many others we've known for a long time. Others we continue to seek out and test.

We are tradition and humanity

We are a family with deep roots, planted in the history of a territory and a community rich in values and traditions. We work to preserve this heritage of "knowledge" and pass it on to new generations. We care for the land around us, as our mothers and fathers have always done. We practice environmental sustainability because our future depends on our love for the land: as citizens of the planet, and as a company dedicated to natural food of the highest quality.

We are a Green Company

Cascina San Cassiano is always attentive to safeguarding the eco-system in the production cycle. With the use of fully recyclable materials and the installation of photovoltaic systems for energy production, we have achieved positive results in terms of energy efficiency and environmental impact. All our collaborators and partners are involved in improving environmental sustainability as a natural strategic objective which Cascina San Cassiano is inspired by and which it concretely promotes with consistent technological and organizational choices.

We are BRC, IFS, BIO, iVeg Certified Quality

The prestigious international certifications BRC and IFS assure consumers of the quality and health and hygiene safety of the various food lines through the management system based on the HACCP methodology. The certifying body used by Cascina San Cassiano is Bureau Veritas. The iVegan certification guarantees to the consumer the traceability and the respect of the vegan ethics and culture of the products on the market. On our labels you will find the symbol shown above. The "organic" certification identifies a production system that respects the natural life cycles of the ingredients of our products, the characteristics of the soil and biodiversity.

Pizza sauces

♥ ♦ ♥ ♦ ♥ ♦ ♥

Pizza sauces

These simple and tasty sauces are made with 100% Italian tomatoes and typical cheeses, to be used to dress pizzas, piadine and focaccia.

The sauces recall the flavors and aromas of the traditional Italian "pizzeria" and are ready to use: open the jar and spread the sauce on the base of dough for pizza and focaccia or for piadine; put in hot oven until fully cooked.

Gluten free.

Velvety & Italian soups

♥ ♦ ♥ ♦ ♥ ♦ ♥

Velvety & Italian soups

Italian soups are a cornerstone of the country's culinary heritage, offering a distinctive way to elevate vegetables through flavorful, well-balanced recipes inspired by an anti-waste philosophy.

Cream soups stand out for their smooth texture and wholesome profile, evolving over time into more refined and sophisticated culinary creations.

Minestrone and traditional Italian soups are characterized by chunky vegetables and can be enhanced with spices, aromatic herbs, or small shapes of durum wheat pasta.

Made with natural, simple ingredients, these products traditionally require long cooking times. Ready-to-serve solutions support consistent vegetable consumption while meeting the needs of a balanced, high-quality diet—without compromising on taste or authenticity.

Gluten free.

Sauces for meat & cheese

♥ ♦ ♥ ♦ ♥ ♦ ♥

Sauces for meat & cheese

Refined combinations of fruit, vegetables, and spices that, processed through various methods to create natural sauces or mustards that can be preserved over time.

The Italian mostarda is a specialty of candied fruit, prepared with artisanal method, dipped in sweet mustard syrup.

The fruit, after being carefully selected, and after a candying process of 15 days, is placed in jars together with the syrup.

Their sweet and spicy taste at the same time is a flavor that goes perfectly with both red meats and with cheeses.

Gluten free.

Extra Jams and Marmalades

♥ ♦ ♥ ♦ ♥ ♦ ♥

Extra Jams and Marmalades

Jams made from chopped fruit and brown sugar obtained from fruit picked at the right stage of ripeness; no chemical additives (preservatives, colouring agents, pectin) are used in the transformation process.

The jam is cooked in a vacuum to avoid oxidation and at a temperature below 70 °C; pasteurisation in jars does not exceed 80 °C to best preserve the properties of the fruit. The jam can be defined as "extra" as the fruit percentage is greater than or equal to 50%.

Our jams are vegan and contain a high fruit percentages.

Gluten free.

Jams and Marmalades with stevia

♥ ♦ ♥ ♦ ♥ ♦ ♥

Jams and Marmalades with stevia

Jams made from chopped fruit and sweeteners: erythritol and steviol glycosides.

Cooking takes place under vacuum to avoid oxidation and at a temperature lower than 70 °C; pasteurization in jars does not exceed 80 °C to keep the properties of the fruit at their best.

Both stevia and erythritol are calorie-free sweeteners and do not alter the glycemic index, and are therefore recommended for people suffering from diabetes, as well as for those who, even following dietary regimes, do not want to give up taste.

Gluten free.

♥♦♥ Jams and Marmalades with stevia ♥♦♥

Peach preserve with stevia

Jam sweetened with stevia. Low calories and full taste, it is suited for vegetarians and vegans, because instead of pectine of animal origin we use agar-agar, an algae with gelifying power. To spread on bread, to garnish cakes and sweets, to enrich ice cream and white yogurt.

Code **CSC336**

Fruit in syrup

♥ ♦ ♥ ♦ ♥ ♦ ♥

Fruit in syrup

Goodies obtained from high quality fruit, picked at the right degree of ripeness and processed after a few hours. The preparation is entirely manual with the exclusive use of water and cane sugar. The jars are then pasteurized and the optimal preservation is guaranteed by vacuum. Preservatives and colorings are not used.

Gluten free.

The background of the entire image is a top-down view of a light-colored surface. It features large, artistic swirls of dark chocolate and light-colored almond butter. Scattered around these swirls are various ingredients: whole almonds, almond halves, almond meal, and small pieces of chocolate. A white rectangular box is centered in the image, containing text and decorative heart and diamond symbols.

Sweet spreads & Desserts

Sweet creams prepared with simple and natural ingredients in order to obtain tasty and genuine products for real food lovers; the raw materials, carefully selected, are mixed with patience and skill, until a soft and spreadable mixture is obtained, totally free of preservatives and artificial colorings.

Spoon desserts of international renown, with their distinctive flavor, are offered in single-serve portions. They can be stored in the pantry and require refrigeration only before consumption.

And finally, honey: a natural product, whose quality depends on some essential factors such as the environment, the climatic situation, the industriousness of the bees and the skills of the beekeeper, combined with dried fruit it turns into an excellent mix.

Gluten free.
